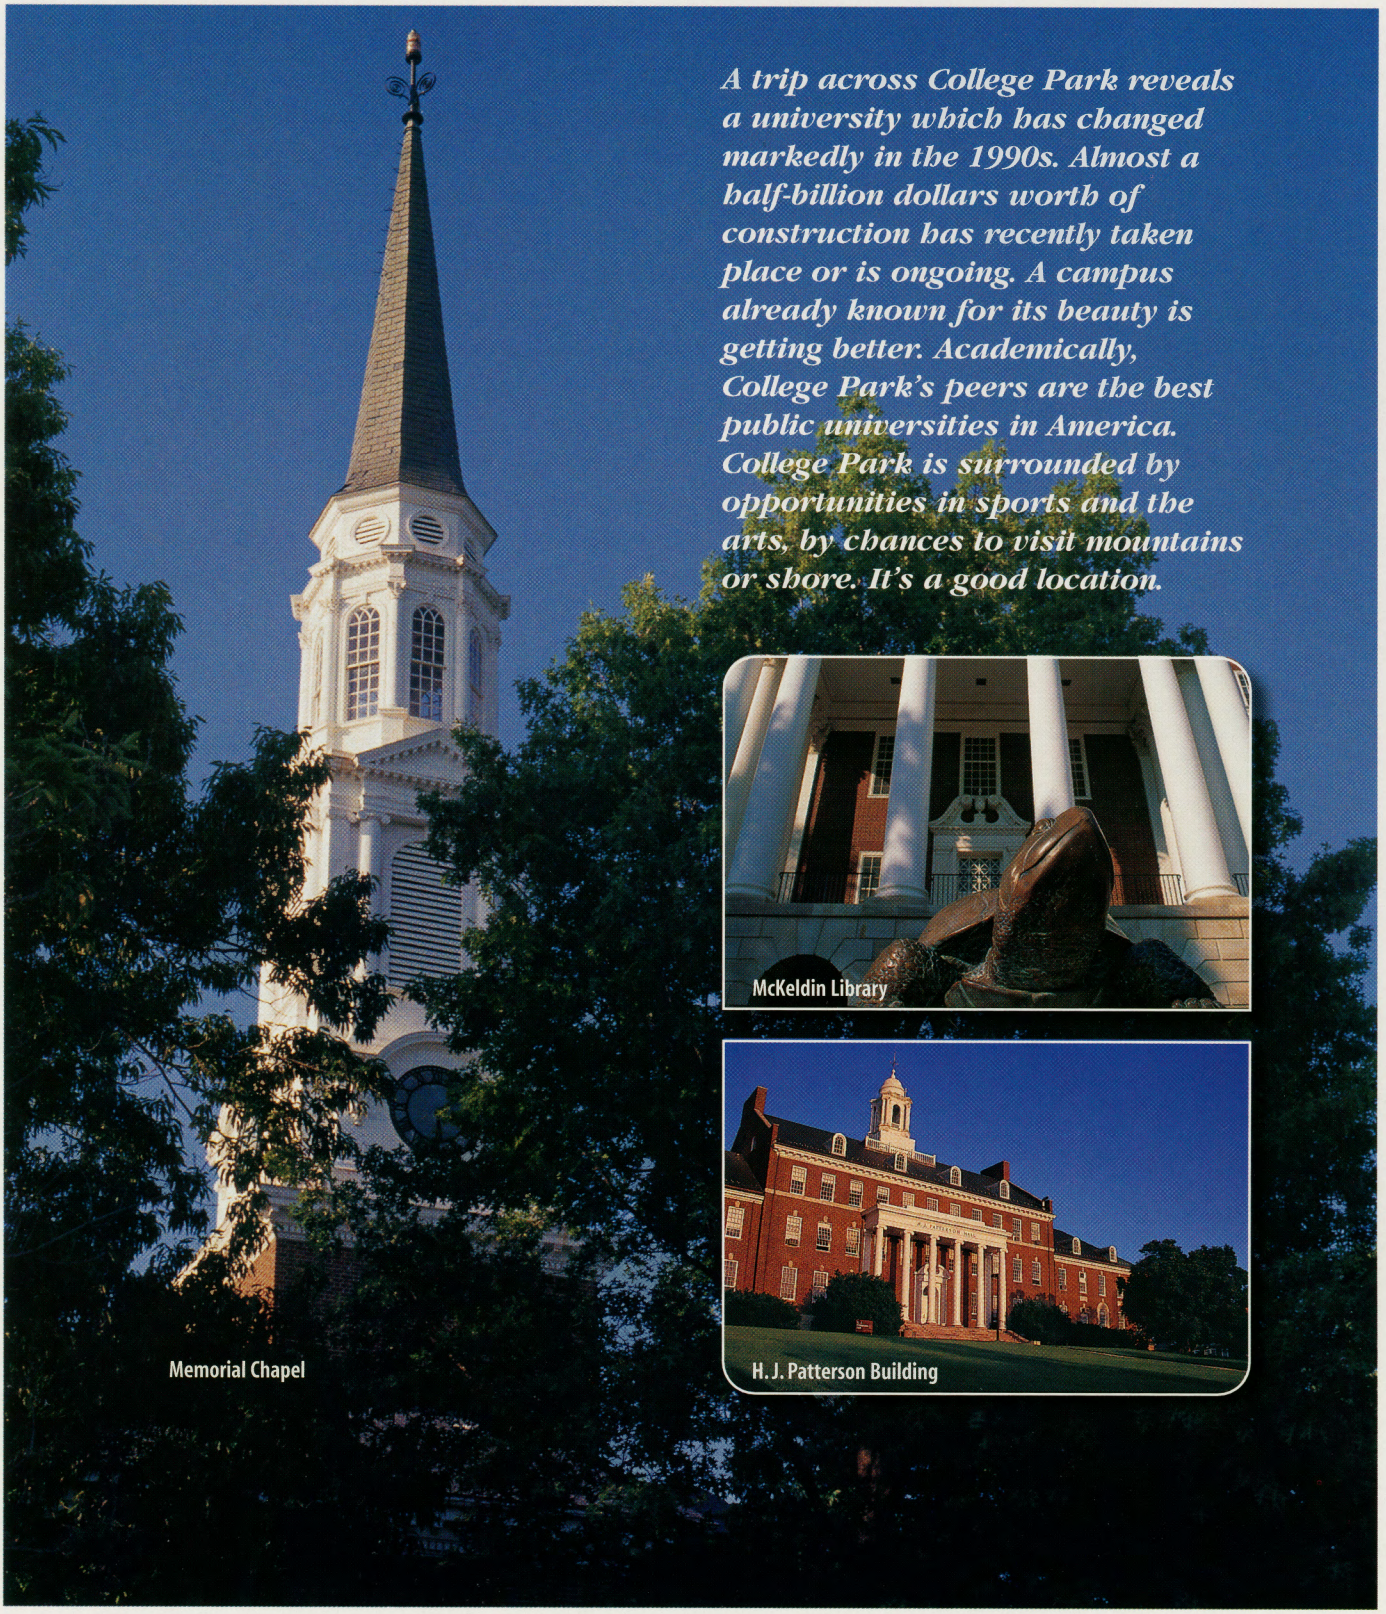
UNIVERSITY OF

MARYLAND



A trip across College Park reveals a university which has changed markedly in the 1990s. Almost a half-billion dollars worth of construction has recently taken place or is ongoing. A campus already known for its beauty is getting better. Academically, College Park's peers are the best public universities in America. College Park is surrounded by opportunities in sports and the arts, by chances to visit mountains or shore. It's a good location.

The University of Maryland Media Relations Office is always open and interested in helping members of the media in their coverage of the Terrapin women's soccer team.

Photographs, feature ideas, statistics and results are always available from the Maryland Media Relations Office. Player interviews are conducted before practice and after games. Please contact Andy at least 24 hours in advance to arrange interviews. Head Coach Alan Kirkup can be contacted for interviews by calling (301) 314-7034. The best time to contact Coach Kirkup can is during late morning hours throughout the week.

The University of Maryland is an equal opportunity institution with respects to both education and employment. The University does not discriminate on the basis of race, color, origin, sex or handicap in admission or access to, or treatment or employment in, its programs and activities as required by federal (Title VI, Title IX, Section 504) and state laws and regulations. Inquiries regarding compliance with Title VI of the Civil Rights Act of 1964, as amended; Title IX of the 1972 Educational Amendments, Section 504 of the Rehabilitation Act of 1973, or related legal requirements should be directed to the Office of Human Relations, 1107 Hornbake Library, University of Maryland, College Park, MD 20742; Telephone 301-405-2838. Inquiries concerning the application of Section 5-4 and Part 34 of the C.F.R. to the University of Maryland, College Park, Maryland, may be directed to the Director, Disabled Student Services, 0126 Shoemaker Hall, University of Maryland, College Park, Maryland, 20742; Telephone (301) 314-7682 (voice) or (301) 314-7683 (TTY).

The 1997 University of Maryland Women's Soccer brochure was written and edited by Media Relations intern Andy Krauss. Special thanks to Mark Ragonese, Tricia Harris, Dave Gell and Chuck Walsh of the Media Relations office. Thanks also to Photographer Lisa Heifert. Sally Gatley of Forms 'N Print in Hyattsville for coordinating the layout and printing and a great deal of thanks goes to her for her kindness and patience.

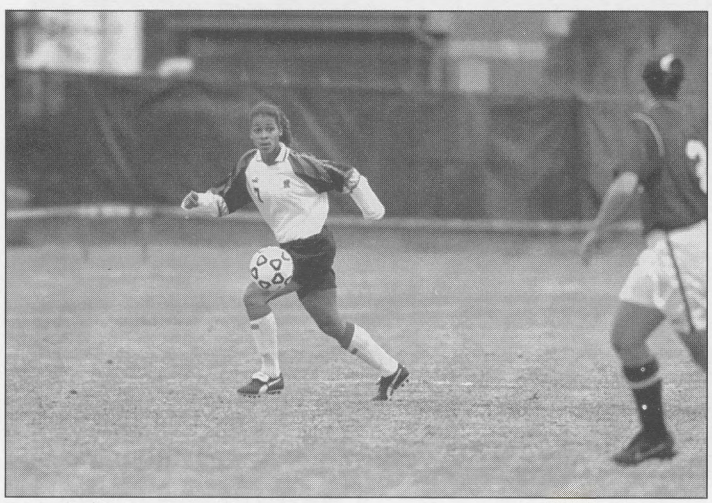
Keri Sarver

Reaching for the Final Frontier

In its 11th season of existence, the Maryland women's soccer team will begin the 1997 season with its best squad ever. After reaching the NCAA quarterfinals two years in a row, the 1997 squad is hoping to go deeper into the NCAA Tournament.

Truly a program on the rise, Maryland has improved on its win totals during six of the last seven seasons, and has reached the NCAA Tournament in each of the past two years. This team returns a lot of experience and has gained a great deal of confidence under second year head coach Alan Kirkup. The team returns eight starters, including juniors Emmy Harbo and Keri Sarver. These two forwards were incredible offensive compliments to each other during the 1996 season. Harbo set the team single-season record for goals in a season with 21, while Sarver set the team single-season record for assists with 15. Both players shattered the team record for total points in a season as Sarver scored 47 and Harbo scored 45. This tandem has only begun their dominance in College Park. As juniors, they have two more years to form what may be one of the best one-two punches in women's soccer.

Leading an experienced midfield in 1997 will be senior Michelle Deville. A model of consistency for three seasons, Deville brings senior leadership to the squad. More importantly, she poses a third major threat to put the ball in the opposition's net. Joining Deville in the midfield is junior Robin McCullough, a Second Team All-ACC selection in 1996, and another major threat to score. Senior tri-captain Michelle Salmon is also expected to start for the fourth consecutive season in the Terrapin midfield. Sophomore Emily Janss will be expected to expand on a freshman season that saw her excel both offensively and defensively. Senior tri-captain Natalie Rich, sophomore Lindsay Basalyga, juniors Wendy Baldwin and Marybeth Egan, along with newcomers Tina Lacertosa and Courtney Martinez, will add depth to all midfield positions this season.



Michelle Deville

Defensively, Maryland will look to some new faces for the 1997 season. The losses of All-America Erin Taylor and Maureen McDonough place the leadership on returning starters Tiffany Keyes and Laura Varela. Junior Abby Bausman and sophomore Julie Nelson will also hold pivotal roles in Maryland's defense. Sophomore Jackie Mynarski was one of the first players off the bench in 1996 and is expected to see expanded playing time this season. Freshmen Teri Greer and Vita McKenna will also be looked upon to fill the holes that McDonough and Taylor left.

At the anchor of the defense, the goalkeeper position is going to be ably filled by two new faces: Riki-Ann Serrins of Mission Viejo, Calif. and Alli Wolff of Richmond, Va.

The Schedule

Maryland's 1997 schedule is one of the toughest in the nation. Sixteen of Maryland's 20 opponents appeared in the 1996 NCAA Tournament. Those 16 teams had a combined regular season record of 228-77-20 (.732). The schedule includes NCAA champion North Carolina at Ludwig Field on October 10 and Final Four participant Santa Clara at George Mason on October 3. It also includes the ACC schedule that features seven NCAA Tournament teams.

The home schedule will feature seven of the NCAA Tournament qualifiers in the nine home dates. Seven of those home dates will be featured on weekends, which will be Friday nights and Sunday afternoons.

The Terps will host the Inaugural Puma Tournament on September 12 and 14 at Ludwig Field. The tournament will feature NCAA Tournament participant and ACC-rival Wake Forest, as well as local rivals Loyola (MD) and Pennsylvania.

This year's ACC Tournament will be held at Wake Forest University in Winston-Salem, N.C., on November 6-9.

Alan Kirkup

Head Coach
Second Season at Maryland
(19-5-2, .769)
Eleventh Season Overall
(167-58-9, .733)

Alan Kirkup's first year as head coach at the University of Maryland was marked with several program milestones. The Terps gathered the most single season wins in program history (19), as well as the best winning percentage for one season (.769). He also helped the team to its second consecutive appearance in the NCAA quarterfinals, while compiling a school record of 14 consecutive wins to start the season, which led to a 16-game undefeated streak. Other highlights of 1996 included Erin Taylor being named ACC Player of the Year and being named as an All-American. In addition, Emmy Harbo was named First-Team All-ACC.

Kirkup became Maryland's fifth head coach in the program's history via Southern Methodist University. Kirkup averaged nearly 15 wins a season at SMU, leading the Mustangs to four NCAA Tournament berths and six top-20 national rankings. He coached six All-America honorees and 21 All-Region selections during his 10-year career. Kirkup pioneered the Southern Methodist program in 1986 and was the program's only coach prior to arriving at Maryland. During his career at SMU, he recorded 10 straight winning seasons. Academically, during his decade in Dallas, more than 95 percent of the student-athletes who played for him earned their degrees. In Kirkup's final year at SMU, he guided the Mustangs to a 23-1-1 record, a berth in the NCAA Tournament Semifinals, and a number 3 spot in the final 1995 national rankings.

Kirkup, a native of England, competed for the world famous Manchester United Football Club from 1973 to 1976, and for the England Youth in 1975. He played and administrated for the Loughborough University Football Club from 1977 to 1981, then came to the United States to serve as a graduate assistant coach at Eastern Illinois University. After a year of coaching in the U.S., he returned to England to teach at the Netherhall School from 1982 to 1985. Thereafter, he accepted the men's assistant coaching position at SMU, and a year later, became the first women's head coach in Mustang history.

Kirkup is an 'A' licensed USSF coach and holds a bachelor's degree in education as well as a master's degree in physical education awarded from Eastern Illinois University. He and his wife Claudia have two children, Molly, 8 and Stephen, 6.

Lynn Jarosi

Assistant Coach
Second Season at Maryland

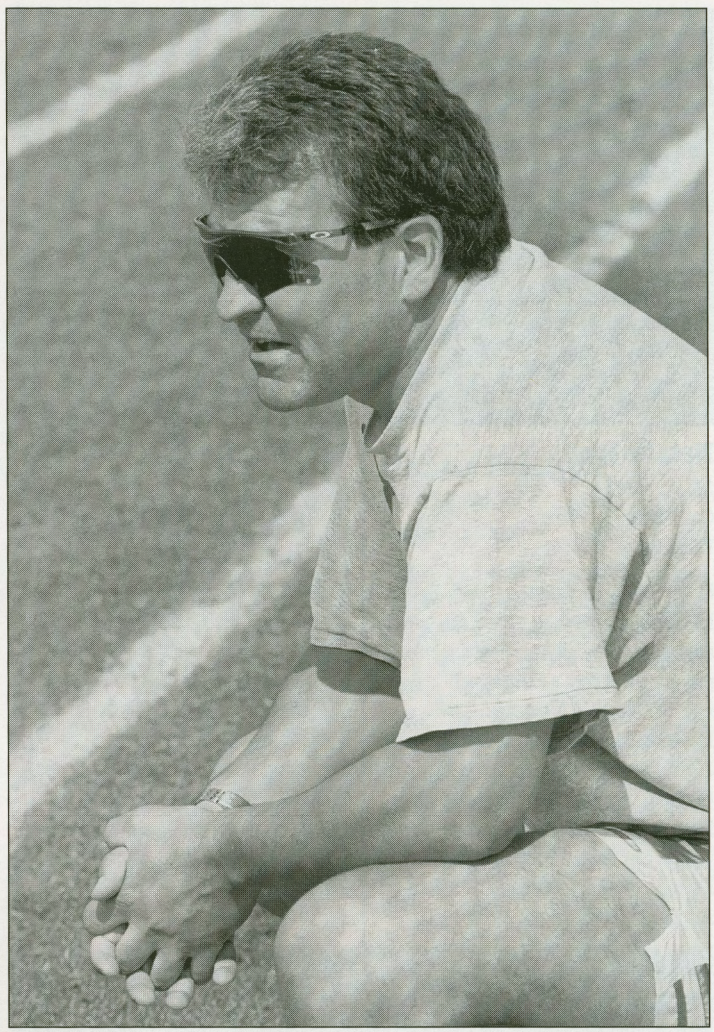
Lynn Jarosi, in her second year as assistant coach at the University of Maryland, will continue to be involved in all aspects of the program including coaching, recruiting, travel and office organization.

Jarosi began her association with Head Coach Alan Kirkup while playing for him collegiately at Southern Methodist University. She was a four-year starter for Kirkup from 1989-1992. A defender, Jarosi helped lead the Mustangs to three NCAA Tournament appearances. She also helped lead SMU to a cumulative 53-24-1 record during her career. The team was ranked in the Top 20 during each of Jarosi's four seasons and finished the 1990 and 1992 season ranked No. 11 in the nation.

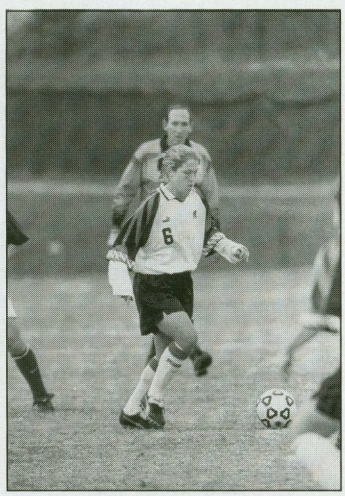
Prior to coming to Maryland, Jarosi served as coach for the Cardinals Soccer Club in Cincinnati, Ohio. During that time, she also worked with the Ohio South Youth Soccer Association as an Olympic Development Program coach.

Jarosi was an assistant coach at Florida International University during the 1994 season.

A native of Columbus, Ohio, Jarosi was a four-year letterwinner at Westerville North High School and captain of the Region II Olympic Development team for three years. She was a member of the Texas State Select Team and led that team to the national tournament during the summer of 1993. Jarosi holds a USSF 'C' coaching license. She earned a bachelor's degree from SMU in Psychology and a master's degree in Psychology from University of Cincinnati in 1996.



Second-year Head Coach Alan Kirkup



Robin McCullough

The Terps

Natalie Rich

Sr. Forward
Co-Captain
Ellicott City, Md.

In her third year with the squad, Natalie has been chosen to represent the team as a co-captain ... Was a valuable role player on last year's team which reached the NCAA quarterfinals ... Played in 11 games and started in one in 1996 ... Was a member of the U-17 Olympic Development Team and was a First-Team All-State selection her senior year at Centennial High School ... A Kinesiological Sciences Major ... Born August 12, 1975.

Giving Back to the Soccer Community

Kelly Amonte (Class of '96) is playing for the U.S. National women's lacrosse team and is a sales representative for Brine, Inc.

Michelle Demko (Class of '96) is playing on a professional soccer team in Germany.

Polly MacKay (Class of '88) is a retirement plan manager in Gainesville, Florida.

Stefanie Magro (Class of '95) is currently the lead singer of the band "Hippo," which performs in the local area.

Maureen McDonough (Class of '97) is student teaching and completing her degree at Maryland.

Leslie Kehrin (Class of '95) is currently an assistant women's soccer coach at University of Missouri.

Stefanie Papageorge (Class of '95) is married and lives in Dallas, where she coaches a U-12 girls' soccer team.

Missy Price (Class of '97) is now a graduate assistant goalkeeper coach at the University of Virginia.

Tricia Taliaferro (Class of '96) is now an assistant women's soccer coach at the University of Illinois.

Erin Taylor (Class of '97) is coaching club soccer in Gainesville, Florida.

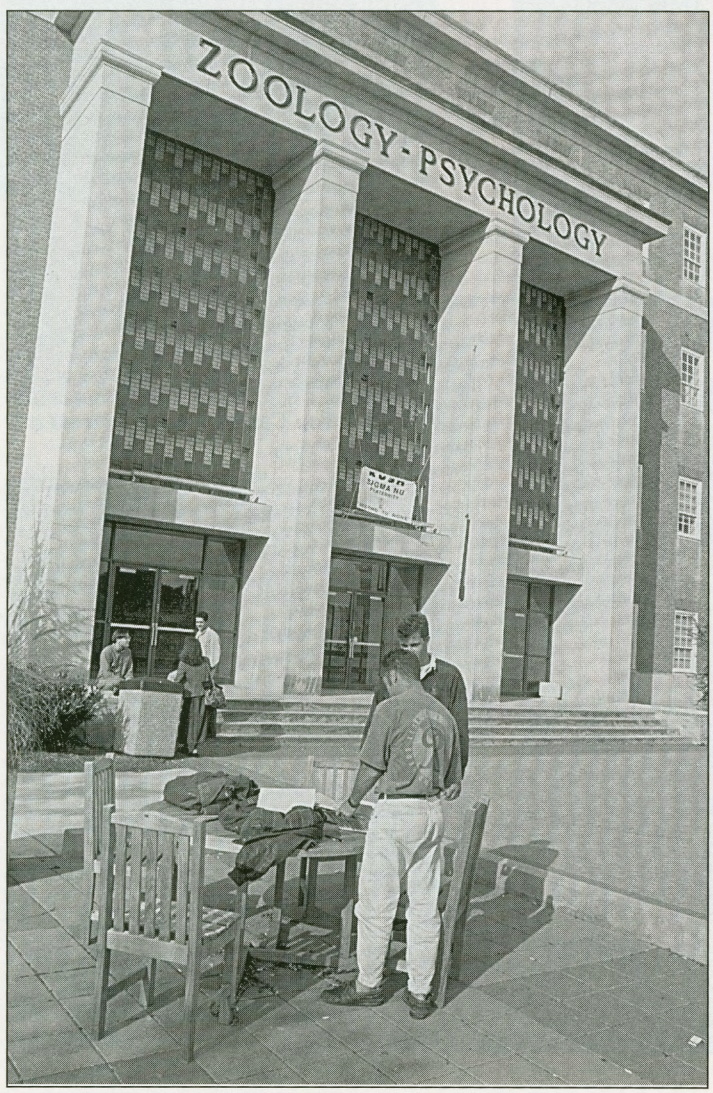
The University of Maryland at College Park

The Campus

The University of Maryland, College Park, is the most comprehensive institution of higher education, research and service in the state. The university offers 98 undergraduate majors, 87 master's programs and 68 doctoral programs in 13 college and schools.

The university is one of only 30 public research universities that are members of the prestigious 58-member Association of American Universities and the only public institution in the Maryland-D.C. area with a membership in the nation's most distinguished honor society, Phi Beta Kappa. It is classified as a Research-1 university by the Carnegie Foundation by virtue of the range of its baccalaureate programs, the amount of federal support received and the number of doctoral degrees awarded each year, sharing that honor with the top research universities in the country.



Among the public universities in the Association of American Universities, College Park ranks among the top percentage of African-American undergraduate students. In addition, the university has the largest number of African-American and other minority members among its peers.

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost $140, grades were sent home weekly to parents and students could obtain room and board for $300 annually.

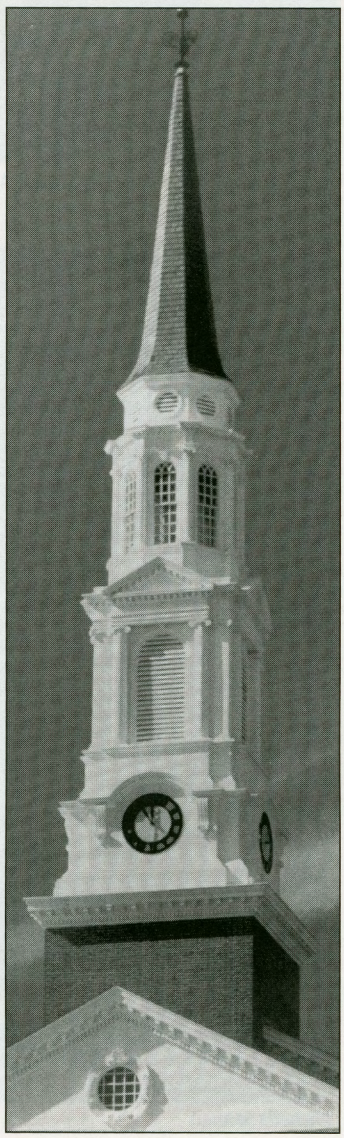
Five years later, the growing institution was renamed the University of Maryland. Despite the name, the university was not considered a state institution as it was still owned and operated by the faculty. Baltimore College of Dental Surgery, the first dental school in American, became part of the university in 1840, awarding the first Doctor of Dental Surgery (D.D.S) degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of Maryland, College Park, was opened under a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of courses in ancient and modern languages, natural sciences, English and mathematics. After a disastrous fire on campus in 1912 the state acquired the college and rebuilt it.

In 1920, the state legislature combined the College Park institution with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, on the Eastern Shore and the worldwide University College, a continuing education institution.

The following decades saw the increasing growth of its' student population, excellence in programs and curricula, and the burgeoning of the University of Maryland, College Park, into a nationally recognized research institution.

July 1, 1988, marked the dawn of a new era in higher education in the state of Maryland, as the five components of the university were merged with six other state universities and colleges to form the University of Maryland System and College Park secured its flagship status with a mandate to become one of the pre-eminent research universities in the nation.



The University of Maryland at College Park

Research

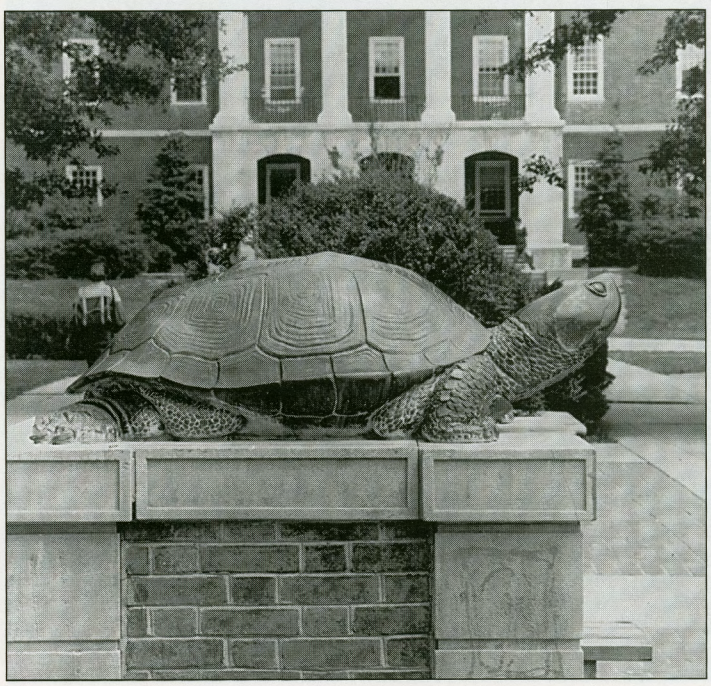
The unique role of American research universities in advancing science and technology has kept the United States in the forefront of innovation and product development. Research dollars from federal and state agencies, corporations and foundations fuel much of the basic and applied research activity of the University of Maryland, College Park's faculty and graduate students.

The university has unique facilities, research centers and institutes that attract new research projects and funding, as well as provide expanded knowledge in business, science and technology. The A. James Clark School of Engineering houses the Glenn L. Martin Wind Tunnel — the most advanced aerodynamic testing facility of its kind on any university campus — and the Natural Buoyancy Facility, which simulates weightlessness for space research, the only such facility on a university campus. Other specialized facilities include: Computer Vision Laboratory; Bioprocess-scale up Laboratory; Laboratory for Ion Beam Research and Application; Superconductivity Research Center, Laboratory for Plasma and Fusion Studies, Psycholonguistics Laboratory; Computer-assisted Cartographic Laboratories; Developmental Psychology Laboratory and the Center on Aging.

Service

Programs of public service are central to the overall mission of the university. The philosophy is reflected in the wide array of programs and initiatives that benefit the state's business, agriculture and education communities.

With more than 90 high technology firms in the three-county area of Montgomery, Prince Geroge's and Frederick counties, the university has found abundant opportunity to extend its business and technology outreach programs to the region. Many of these programs are part of the Engineering Research Center, which operates the Technology Advancement Program and the Maryland Industrial Partnerships, all programs designed to provide Maryland entrepreneurs and small businesses with research facilities, technical assistance, administrative support and access to technology that will advance their economic base.



The Institute for Systems Research has formed partnerships with major corporations, including Lockheed Martin, Westinghouse, BF Goodrich, Hughes Aircraft and Dupont, to apply advanced systems research to solving industry problems in the fields of communications, manufacturing, controls and rob otics.

The University of Maryland features a diversity of cultural and recreational activities. Four art galleries, more than 200 annual musical performances and countless dance and theater productions, expose audiences to the broadest range of programs in the arts. Intercollegiate, club and intramural sports provide students of all levels an opportunity to participate as spectators or athletes.

The Libraries

The seven libraries at the university constitute the largest university research library institution in the Washington Metropolitan area, providing vital resources to researchers, visiting scholars, and businesses throughout the region. The libraries'

The University of Maryland at College Park

holdings include more than 2.5 million volumes, 24,000 subscriptions to periodicals and nearly 5 million items available in microfilm format. University libraries also offer several nationally and internationally recognized special collections such as the International Piano Archives at Maryland, the National Trust for Historic Preservation and the National Public Broadcasting Archives.

The Alumni

Graduates of the university go on to distinguished careers in many fields. Chosen from thousands of qualified alumni, an inaugural group was inducted into the University of Maryland Alumni Association Hall of Fame in 1995. They included 21 outstanding individuals who have brought and continue to bring, great honor to their alma mater. Their achievements are as varied as their lives, but the all have one thing in common: a degree from the University of Maryland, College Park.

History of College Park

Just after the American Revolution, the state of Maryland established its first two colleges at Chestertown and Annapolis. By the 1850's, at least 30 little colleges had sprung-up over the state, many with state support, but many of them disappearing within a few years. Then in 1859 a different kind of institution appeared at College Park—the Maryland Agricultural College—the third such college in the world, created mainly for farmers' sons. The college was established by Charles Benedict Calvert, a wealthy planter from nearby Riversdale—now Riverdale—and later a congressman. Calvert built a handsome Gothic dormitory-classroom structure located in a grove of trees near the present Morrill Hall, and he divided the land down the Baltimore-Washington Turnpike into small plots where each of the 50-or-so students experimented with a different crop. After the Civil War the institution became a land-grant college, with small appropriations from Washington. The little college began to grow about 1900 when agricultural experiments began to bring prosperity to Maryland, and when the college expanded its offerings into engineering, business and the liberal arts. In 1912 the old Gothic building burned, and the state provided modern structures. Women were admitted to the campus, and graduate work began. In 1920 the college combined with the long established professional schools of Baltimore and changed its name to the University of Maryland. Growth accelerated after 1935 when the politically astute football coach, H.C. "Curley" Byrd, became president, added scores of new programs, and won national football championships. In the 1950's and 1960's President Wilson H. Elkins maintained the rapid growth, and College Park became one of the largest campuses in the nation. President Elkins, a Rhodes Scholar, transformed the institution's public image to one of high academic integrity. In the 1970's and 1980's the University's graduate and research programs flourished. In 1988 the General Assembly of Maryland combined six state colleges with the five campuses of the University of Maryland, and specifically charged College Park with the role of leadership in the revamped system.

University Traditions

Testudo is a Diamondback turtle. Like some other famous personages born into the Depression of the 1930's, the derivation of his name is cloudy. But it is likely that his moniker is derived from the scientific classification for turtle (testudines). Or the top turtle could be named after testudo gigantia, a species native to the African nation of Seychelles and one of its remote islands, Aldabra. Or the name could have come from a dictionary definition that says the word, testudo, was derived from the Latin and meant a shelter held over the head of Roman soldiers —like a tortoise shell. These explanations are a long way from the Chesapeake Bay where the Diamondback lives.

When Testudo had his coming out on May 23, 1933, he was thrown into a world filled with intimidating mascots—Wildcats, Tigers, Devils, Wolves, Bears—thought up over a half-century of intercollegiate competition. The University of Maryland was consolidated from different state schools in 1920 to form the base of today's wide-ranging state system, and the remodeled Maryland needed a flag carrier to do battle with Wahoos, Lions and Generals.

Dr. H.C. Byrd, a football coach who later became University President, recommended the Diamondback as mascot in 1932 in response to the student newspaper's search for an "official" leader. Byrd's childhood in Crisfield, Md., apparently included skirmishes with this brand of snapping turtle, indigenous to the Bay. The school paper was in fact already called *The Diamondback*, and when the Class of 1933 stepped forward with the idea of giving the University a permanent bronzed version as its graduation gift, Testudo's family was in to stay.

Maryland had been referring to itself as Old Liners, yet another name whose derivation no one seems sure of. Historians are in a scrimmage over whether the nickname is a reference to a Revolutionary War Troop of Maryland soldiers who distinguished themselves on the field of battle, or they feel it could refer to a squabble with Pennsylvanians over just where the border between the two states should be.

The Class of '33 raised money for casting a Diamondback by holding its Senior Prom on campus to save money on expenses. And the yearbook and Student Government Association chipped-in. Edwin C. Mayo, Class of '04 and a former quarterback, donated at cost the 300 pound bronzed beauty as President of Gorham Manufacturing in Providence, R.I. Robert J. Hill cast the inspired sculpture accomplished by company artist Aristide Cianfrani. Further turtleization came when the student yearbook, *The Reveille* became *The Terrapin* in 1935. Newspapers, even then exploring every angle, shortened Terrapin to Terp for headline writing ease when it wasn't trying to cram Old Liner into a single column head. The name was in place; now came the stuff of legend.

The Stuff of Legend

The nicely thought out plans that made Testudo an instant hit did have a flaw. Putting Mr. T in front of the campus gym, Ritchie Coliseum, exposed Testudo to every road agent wearing enemy colors. Ritchie was right on U.S. Route 1, then the principal North-South highway along the Eastern Seaboard. When a less

dignified opponent needed something extra against the turtle and his troops, they practiced emotional blackmail, and kidnapped him.

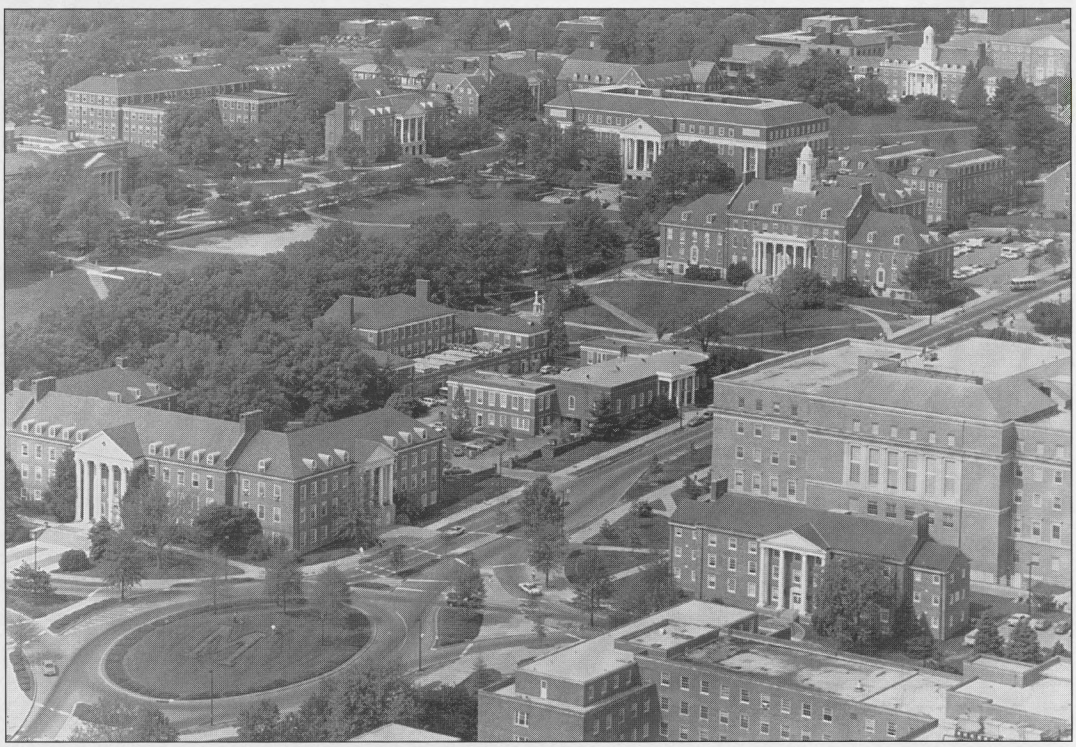
That was not the worst of it. They painted his golden skin enemy colors, and defaced his pedestal which was only to have the block M on it. Instead, opponents painted illegitimate JH's or GW's or V's or NC's on his nest. A riot took place when Johns Hopkins students kidnapped the handsome reptile in 1947; 200 police were called to the Baltimore campus to control the justified anger of College Park students. Two years later, the nifty shelled crusader was found on the lawn of a Virginia (The University) fraternity house, whose occupants smugly called President Byrd with the message to get Testudo off their lawn. Of course Byrd obliged, and soon after Testudo was hidden in the campus carpentry shop where he was less inspirational, but a whole lot safer.

The second stadium bearing Byrd's name was built in 1950, and in 1951 Testudo, sans coats of rivals' paint, took his perch in front of the Byrd Stadium football team house. He had beaten back all who would wrong him, and to make sure he would not travel again, he was fed 700 pounds of cement and had his body attached to a new pedestal by long steel rods.

With his permanent nesting came success for Maryland. Acting as guardian to waves of Terp competitors, the national football championship came, as did several ACC titles in the 1950's. His popularity among the students might have been the undoing of success, however. When McKeldin Library was constructed in the middle of campus, the student body demanded Testudo's full-time presence in the center of day-to-day activities. Testudo had gone far beyond being just a symbol for athletics. He was a campus symbol. Students carefully carried him up the hill to the main College Green and the library, and he was bolted to a new bed of stone in the early 1960's.

Coincidence or not, football did have a downturn in the 1960's with Testudo absent. In the 1970's, when a costumed Testudo started to roam the sideline, success was returning. The furry Testudo reigned over unrivaled ACC football prowess, and sent Terps out to the four corners of the football world for bowls and intersectional clashes.

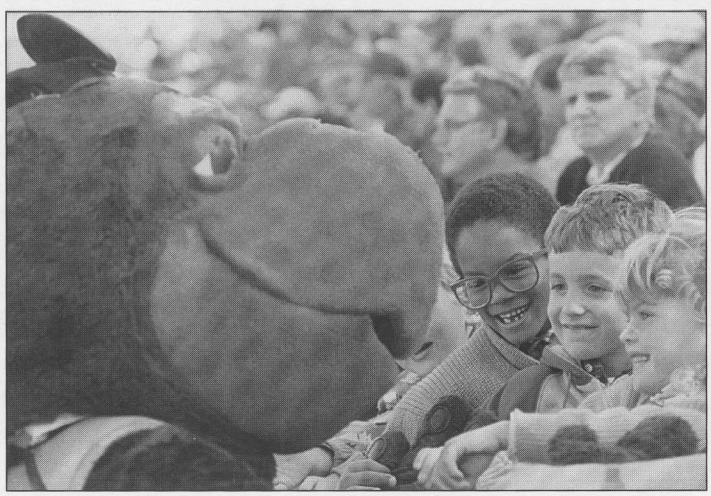
In 1992, a bronze duplicate to Testudo was created and installed just outside the new Football Complex locker room door. As the football team takes the field the team congregates around the bronze Terrapin, and then all touch his nose for good luck. In 1995, Testudo was again duplicated as a bronze Terrapin statue was placed in Cole Field House as part of the lobby refurbishment.



Joel Meisner Co. of Farmingdale, N.Y., created the duplicates. Two men spent two days in June of 1992 pouring a rubberized material over Testudo as it sat in front of McKeldin Library, followed by a wax mold on top. After a day to let the molds set, the wax was broken and easily removed. The rubber mold, which actually recreated Testudo, was painstakingly peeled away from the bronze and taken back to Meisner's factory where the first duplicate was created using the Lost Wax method.

While Testudo was being copied by Meisner Co. in front of McKeldin, the research library was undergoing extensive refurbishment. As part of the new interior and exterior McKeldin received, the original Testudo, was given a new pedestal and his bronze coat was cleaned. The Class of '33, which created Testudo in the first place, used its 60th reunion to dedicate the rejuvenated campus symbol.

Fifty-nine years ago, the Diamondback Turtle Gorham used as a model for the shelled wonder had a ribbon attached to it at the dedication. The ribbon was tied to the canvas covering the statue. The Diamondback moved forward, and revealed the splendor of his larger, bronzed brother. But no one rushed the smaller Diamondback in his duties. All in attendance were true believers who knew what many unfaithful have discovered about Terrapins. They bite.



University Highlights

Forty-four percent of this year's freshman class has a high school grade point average of 3.5 or above.

ARCO's book, *Ivy league Programs and State School Prices*, rated the University Honors program among the nine best in the nation.

US News and World Report rated Maryland's business and engineering programs in the top 25 among all public and private institutions.

Last year, faculty researchers at College Park were awarded almost $150 million in competitively funded research programs and development awards, an increase of 83 percent since 1988.

No other university in the mid-Atlantic region has more top-20 graduate programs in computer, mathematical, physical sciences and engineering disciplines than College Park, according to a recent analysis by the National Research Council.

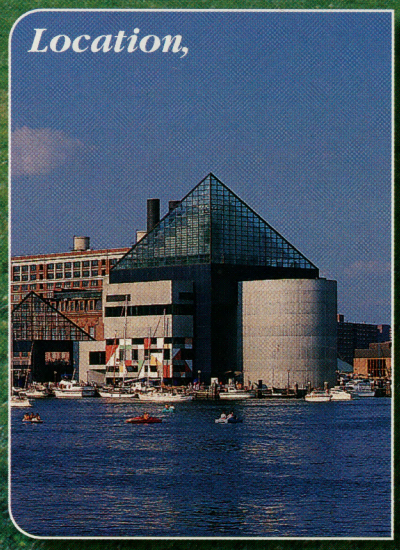
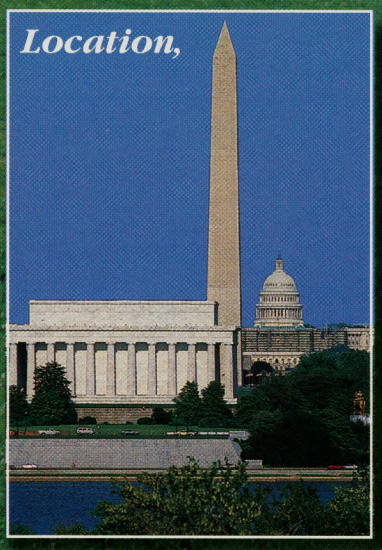
UNIVERSITY OF

MARYLAND

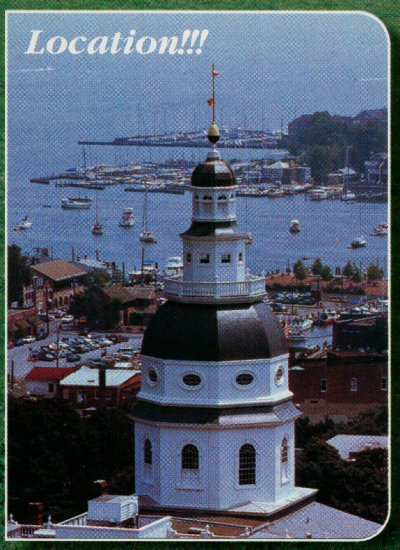
McKeldin Library is part of A College Park system that contains millions of volumes. Recently refurbished, McKeldin's front plaza is home of Testudo.



35 miles separate College Park from Baltimore and the Inner Harbor, with easy access by train available.



3 miles are all that separate College Park from Washington, D.C. The Washington Monument is less than 10 miles away—a short drive or Metro ride.



Annapolis' waterways lead into the Chesapeake Bay, with room for thousands of sailboats.
